Kalipso-Ukraine

We value novelty, non-standard approach when it comes to creating a product. Every year we visit the most important tourism related exhibitions and conferences, such as ITB Berlin, to get inspired and to develop new contacts

We trace the latest demands and offers on travel market, in order to create unique tours, that will stand out in the crowd of competitors. That is how the project "Expeditions with Kalypso" was born.

As a response to the rapidly growing demand from our tourists, who wanted to walk less beaten paths and experience something that would be interesting and unusual, but not as expensive, as an individual tour - we came up with the idea of the project "Expeditions with Kalypso Ukraine. "

We are creating tours, based on the principles of **novelty** and **uniqueness**, most of our expeditions are non-standard routes, which 95% of tourists do not see. We combined the experience of 9 years of work in the market, reliable partners in different countries and the possibility of traveling in groups of up to 10 people (makes the route cheaper).

**Our corporate customers remain loyal to us through rough years and appreciate our individual approach to every each of them**
