were born, brought up and died without ever seen a day light. After the revolution the extraction of the shell-rock was forbidden. **Odessa Catacombs** - these intricate labyrinths at some point turned into a safe place for all sorts of criminals and deserters. They were escaping into one of secret corridors and then will safely emerge onto surface of earth a few kilometers away from that point. And in case of a siege, criminals could hide under the ground for weeks, using food stores and wells they had there. For smugglers, labyrinths served as stores for illegal goods. **Free time in the city. Overnight.**
